

Interact™ – Telephone Calling Made Easy

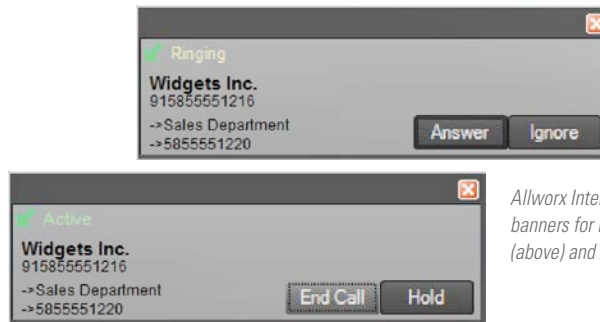

Leverage the power of your PC to manage your phone calls and increase productivity

Allworx Interact™ applications enable customizable control of your Allworx phone and bring effortless communication to your desktop.

Interact

Allworx Interact, a free application available to any Allworx user, improves efficiency by offering an easy way to identify an incoming caller from your PC screen and allows you to answer calls without having to look at the phone.

Allworx Interact pop-up banners for Ringing Phone (above) and Active Call (left).

Interact Professional

Allworx Interact Professional, a per user licensed application, enhances productivity by enabling users with total control of their handset. Convenient access to call history and a complete list of contacts from the Allworx directory empowers users with information and control to give them a competitive edge and better serve their customers. Microsoft Outlook contacts are also incorporated into the Interact Professional database, allowing rapid lookup and one click dialing. The ability to easily search contact lists, including both the Allworx directory and the user's personal contacts, makes placing calls much faster and more reliable.

Allworx Interact Professional main screen with all windows docked. Each window can be moved out of the Interact screen and pinned wherever you like for use when other applications are active.

Professional Control

With **Interact Professional** you now have control over your Allworx phone in an intuitive and scalable way. Call history and contacts can be searched effortlessly for relevant entries. You can sort these lists in any way that you desire: by date, name or number. From the search results, calls can be placed with the simple click of your mouse, simplifying calling, reducing dialing errors and speeding connections.

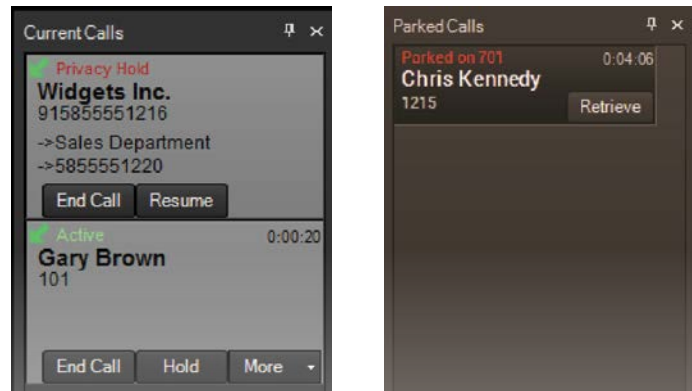

Connecting with your co-workers has never been easier. You can easily see the presence status of other Allworx users before you call them, and determine if they are on their phone or other Allworx device, or if they have set Do Not Disturb status. Multiple windows display current calls, parked calls, a dial pad and more. Interact Professional windows can be pinned to your screen as preferred to enhance your productivity.

Allworx Interact Professional windows (clockwise from top left): Call History, Dialpad, Contacts, Parked Calls and Current Calls.

From information to control, **Interact Professional** has what you need to make your Allworx phone work for you.
