Nortel T7208 Telephone

The T7208 is uniquely suited for lower internal and higher external calling volumes and supports up to eight lines and frequently used features. This multi line telephone offers eight memory buttons, a 16-character LCD window with MWI/VRL and a headset jack. The T7208 is a cost-effective solution for users needing only a few programmable features and/or autodial numbers. IT is well suited for reception areas, for workstations with moderate call volumes and activity - as well as areas with shared telephones, such as retail departments or repair centres.
