Nortel T7316E Telephone

This fully featured multiline telephone has a two-line, 16 character-per-line LCD window with MWI/VRL. The T7316E provides access to a total of 24 memory buttons and it offers ample coverage for business call areas and support for feature-intensive usage. It offers three soft keys to assist employees using the visual display prompts on the LCD and it is targeted to the needs of a wider user group, which includes managers, executive professionals, central answering and administrative positions.
